ORACLE BUSINESS INTELLIGENCE - RAPID START PROGRAM

All companies rely on information to make key decisions. Unfortunately, this information is often difficult to obtain, as it resides across disparate applications, databases or even spreadsheets. This can make the data confusing, conflicting and inaccurate. The solution is Oracle Business Intelligence (OBI).

Oracle Business Intelligence Suite Enterprise Edition (OBIEE)

Oracle Business Intelligence (BI) applications are complete, prebuilt BI solutions that deliver intuitive, role-based intelligence for everyone in an organization—from front line employees to senior management—that enables better decisions, actions and business processes based on complete and real-time information.

Deploying Oracle BI applications will allow you to benefit from a simplified BI tools infrastructure, a BI foundation integrated with your IT architecture and a consistent view of information with single-source accountability. Unlike other BI tools, all components are integrated on a single, common architecture to provide a seamless and intuitive user experience and a unified view of enterprise information. This empowers business users with pervasive insight and combines real-time and historical intelligence to drive actions that improve business performance.

Key Features

- 100% thin client interface
- Intelligence across multiple enterprise sources, including Oracle and non-Oracle data
- Unified BI metadata for all end-user tools
- Rich, interactive dashboards with guided analytics
- Full ad hoc analysis over the Web
- Proactive detection, alerts, and multi-step analytic workflow
- Advanced enterprise reporting and publishing
- Full-featured disconnected analytics for mobile users
- Integration with Microsoft Office

The Solution

The SageLogix Team will design, develop, and implement the Business Intelligence solution you require to transform your data into usable information. Using best practices and our proven deployment process, we will build the strategy and develop the solution that is scaled to your needs while providing the critical functionality you require.

The Rapid Start program allows our customers to transition from Oracle Discoverer to a complete Phase 1 implementation of Oracle Business Intelligence Enterprise Edition. You'll leverage all of OBIEE's benefits, while hitting the ground running through an accelerated schedule.

Products

OBIEE License | Named User (50) - \$80,000
